

# User Guide for Cuper MariU

## How to Start: (Compile Instructions)

Use a MAC.

Open command line tool on your computer (ex: terminal).

Change current directory to "CuperMariU" folder.

Type "make" into terminal. Wait for the game to compile.

Start the game and enjoy!

Make sure to turn on the audio for full game experience!

## Game instructions:

Press enter to start the game.

Press esc to exit.

Control the main character with left, right arrow keys and space key.

Pressing left arrow key moves the main character left.

Pressing right arrow key moves the main character right.

Pressing the space key makes the main character jump.

Pressing direction keys and space key simultaneously is allowed, the main character will move and jump accordingly.

Control the main character to reach the final destination at the end of the map while collecting as many coins as possible and avoiding monsters and gap on the ground along the way.

Coins can be gained by bumping the question bricks.

And monsters can be killed by stepping on their heads.

There are two kinds of monsters, one is the mushroom monster, which flattens before it dies.

The other kind is a turtle monster, which would turn into a turtle shell after it dies.

The main character can send the shell moving and kill other monsters by pushing against it.

Special question brick produces a mushroom that enlarges the main character.

An exclusive scene is hidden in the game. Play till the end to find out! Have fun with the game!
